

PEDESTRIAN WALKWAYS AND JUNCTION REFURBISHMENT BARNSELY MBC - PROJECT BRIEFING

"I found SCD to be a professional and customer focussed company. They really want to understand the customers needs and help them as achieve as much as possible. It was commented by our NRSWA department over how good they were on site whilst carrying out ducting works on one of our primary routes, needing little supervision and maintaining a safe and tidy site."

Barnsley MBC

Barnsley MBC

City Wide Private Optical Fibre Network

Over a number of years Barnsley MBC has developed its own private optical fibre network.

In late 2008 SCD was further commissioned to extend this infrastructure around the city centre's main arterial roundabout at Townend, Barnsley.

The majority of the works involved the upgrading of traffic controlled pedestrian crossings where the kerbing, flagging and hard surfacing was replaced to meet the European directive for the Disability Discrimination Act (DDA).

Project Summary

- Junction refurbishment, including:
 - ◇ Island creation
 - ◇ Tactile paving
 - ◇ Kerbing
 - ◇ Flagging
 - ◇ Fencing
- Pedestrian walkways, including:
 - ◇ Formation of footpaths
 - ◇ GSB type 1 stone
 - ◇ 20mm DBM base course
 - ◇ 10mm DBM wearing course
- Camera column works, including:
 - ◇ Base construction
 - ◇ Column erection
- Installation of telecommunications duct infrastructure, including:
 - ◇ Ducting to OFCOM specification
 - ◇ Chamber construction
